

SKILLS

- **Programming languages:** JavaScript, TypeScript, Python, C, C++, Java...
- **Frameworks/Libraries:** ReactJS, NextJS, VueJS, SvelteJS, NodeJS, ExpressJS, Tailwind CSS, Mantine, MUI, Framer Motion, React Testing Library...
- **Tools:** Git, Webstorm, VSCode, ChatGPT, Notion, Trello, Slack, Photoshop, Figma, Canva...
- **Methodology:** SCRUM
- **Operating System:** Windows, Linux (Ubuntu and CentOS), MacOS.
- **Other:** OOP, DSA, Computer Network, Database (SQL, NoSQL), Office, System Programming, Firebase...
- **Languages:** IELTS 6.0 (June 2022), VSTEP B2 (December 2022), EnglishScore B2 (August, 2023), FPT Upper-Intermediate Global Software Engineer (August 2023)

EXPERIENCE

Fullstack Developer **FPT Software** **6/2022 – Present**

Project: GENIUS – Miroku Accounting Product

Team size: 383

Role: Frontend Developer

Tech stack: ReactJS, Redux...

Responsibilities:

- Developed new React components to enhance the functionality and visual appeal of the accounting dashboard.
- Utilized React hooks and state management to create dynamic and interactive UI elements, improving user engagement.
- Conducted a comprehensive analysis of the existing accounting dashboard, identifying and prioritizing UI bugs affecting user experience.
- Collaborated with QA and backend teams to diagnose and resolve front-end issues promptly.

Project: Zuellig Pharma - a telemedicine product that helps with anxiety, depression, insomnia, and other mental health conditions

Team size: 77

Role: Frontend Developer

Tech stack: ReactJS, I18next

Responsibilities:

- Implemented internationalization (I18n) features to support multiple languages within the healthcare portal.
- Collaborated with translators to integrate and maintain translated content, providing a seamless experience for users across diverse linguistic backgrounds.
- Diagnosed and resolved logic bugs within React components, ensuring accurate data representation and smooth application workflows.
- Collaborated closely with UX/UI designers to implement design refinements and maintain consistency across the application.

Project: FPT Software Global - FPT Software Global website

Team size: 122

Role: Frontend Developer

Tech stack: JavaScript, HTML, CSS, BackboneJS

Description:

- Designed and implemented a responsive user interface for a drag-and-drop application, ensuring a seamless user experience across various devices and screen sizes.
- Utilized media queries and flexible layout techniques to create a visually consistent interface on desktop, tablet, and mobile platforms.
- Identified and diagnosed UI bugs through meticulous testing and collaboration with QA teams.
- Implemented effective solutions to fix layout issues, responsive design discrepancies, and browser-specific rendering problems.

Project: Viettel Cyber Security System - Predict risk and prevent cyber-attack Cyber Security System

Team size: 80

Role: Backend Developer

Tech stack: Python

Description:

- Developed and integrated Python APIs for the VCS system
- Collaborated with frontend developers to integrate RESTful APIs for seamless communication between the frontend and backend, ensuring real-time data synchronization
- Collaborated with system architects to define data models and establish secure communication protocols.

Frontend Developer

OpenCommerce Group

06/2021 - 11/2021

Project: Shopbase – Drag and Drop eCommerce system

Team size: 18

Role: Frontend Developer

Tech stack: VueJS, Vuex

Description:

- Manage and ensure system operation, analyze system logs, find system troubleshooting errors
- Incorporated with a team of 3 software engineers to develop Shopbase frontend app – a big system to help clients build an eCommerce shop quickly and easily.
- Participated in the development of new features for Shopbase, being in compliance with the help docs from Product Management Department
- Learned VueJS to help analysts Log, fix primary bugs...
- Learned using Git, GitLab, WebStorm, Trello, Slack more professionally to solve the problem more quickly

PERSONAL PROJECTS

Fullstack Developer

CShop

12/2023 – 3/2024

GitHub: <https://github.com/ch1nhcp/CShop>

Descriptions: An E-Commerce full-stack app using MERN stack

Tech stack: ReactJS, NodeJS, MongoDB, React Bootstrap, Bootstrap Icon, Git...

Frontend Developer

Goodplace

7/2022 – 8/2022

GitHub: <https://github.com/ch1nhcp/goodplace>

Descriptions: Goodplace is a house marketplace application. You can find and list houses for sale or rent with lots of features (Sorting, geolocation, notification...)

Tech stack: ReactJS, Firebase, HTML, CSS, JS...

Frontend Developer

Foodawesome

6/2022 – 7/2022

GitHub: <https://github.com/ch1nhcp/Foodawesome>

Descriptions: A Food recipes app. You can find meal recipe easily with Spoonacular API, figure out a lot of new cooking recipe

Tech stack: ReactJS, HTML, CSS, JS, Git...

Frontend Developer

ReactMeals

1/2022 – 2/2022

GitHub: <https://github.com/ch1nhcp/ReactMeals>

Descriptions: A simple Food order app. You can add new meals with quantity and easily remove the meal from your menu...

Tech stack: ReactJS, HTML, CSS, JS, Git...

ACTIVITIES AND AWARDS

- ✓ [First Prize at Code4EJS MindX Hackathon 2020](#)
Built *DropWord* – a simple Web app for online learning new words and learning English Grammar with background music and simple UI for everyone.
- ✓ [Third Prize at Code Intensive MindX Hackathon 2021](#)
Built *Filmstation* – a recommending film service combined with cinema booking systems.
- ✓ [Top 30 of 250 contestants in Web coding challenge by MindX x TopCV, 4/2021](#)
Built *Covice* – a system of multiple handy, helpful, productive tools for people who work from home by COVID-19 impact.
- ✓ [Techcontent Mentor, 7/2021 – 12/2021](#)
Mentor for the DIY Camp program, an online coding camp that focuses on communication and self-study for students in high school and college.
- ✓ [JunctionX Hackathon achievement, 12/2021](#)
Built *Formaker* in 2 days – a VueJS web app for creating multiple types of forms, managing forms online...
- ✓ [Top 30 Tiki Hackathon – Hacking Trail 2022, 7/2022](#)
Built *Tiny Travel app* in 2 days – a Tini framework mobile app for travel lovers, seeking buddies, booking hotel, managing and sharing expense for your trip.
- ✓ [Secure Coding achievement, 9/2022](#)
Pass 77.65% JavaScript Secure Coding Assessment on Sep 27 2022
- ✓ [JunctionX Hackathon achievement, 4/2023](#)
Built Safelink - A system for alerting and safeguarding users against fraudulent links.
- ✓ [Udacity Front End Web Developer, 8/2023](#)
Built 5 Front-end Projects to achieved Udacity certificate.
- ✓ [Global Software Engineer Upper Intermediate, 9/2023](#)
Finish 4 Modules: Presentation, ELSA, Cambly, TOEIC test to attain Global SE Upper Intermediate.

EDUCATION

VNU Hanoi-UET

08/2018 – 12/2022

- **Major:** Computer Engineering, **in-major GPA:** 3.33
- **Coursework:** Data Structures & Algorithms, OOP, Operating Systems, Networking, Database, Advanced Programming...
